

Teresa Light grew up with a love of nature, music and art from an early age. Playing piano well at age 4, Teresa went on to win awards on multiple instruments until switching her focus to engineering and the endless possibilities of the web.

Years later Teresa becomes an open-minded technical leader who values people, the power of synergistic teams, innovation, creativity, and continuous learning. Work places under her leadership won “best place to work” awards while achieving high levels of client satisfaction and business success.

First and foremost an engineer, Teresa has an in-depth understanding of requirements development, agile product delivery and the most current web, mobile and virtual world technologies. Teresa has designed and developed tools and solutions for sustainable product development that enabled collaboration, problem-solving and delivery of technical and financial results. As a certified Six Sigma Black Belt and Project Management Professional, Teresa has coached teams to deliver solid business results, including significant reductions in cycle time.

Today Teresa Light and associates create mobile apps and games, responsive websites and engaging virtual experiences that people want to start using, enjoy using and gain benefit from using. Teresa is most passionate about initiatives that promote a better and sustainable world.

Teresa earned a Graduate Degree in Systems Engineering from the Rochester Institute of Technology, and has recently completed most of the requirements for a BS degree in Web Development in Interactive Media from The Art Institutes – San Diego. Always learning, Teresa is active in the local San Diego tech community and regularly speaks at conferences.
